

Shown With Optional 4-Link Plates

1/16th Scale

Strange Ultra 4-Link rear end parts list: Center main housing (1), axle bells, R&L (2), center section (1), axle housing bracket spacers (2), stabilizer tray (1), hubs (2), 1-piece calipers(2), 3D wishbone centering device (1). PE housing and chassis brackets (8), rotors (4 halves), caliper brackets (2) and star-shaped caliper mounting rings (2) anti-roll device arms (4), trim rings (2) and axle bell to hub connector tubes (2).

Refer to picture, at left, for identifying how parts assemble. Bells are keyed so they can only be installed one way in center housing. Trial assembly is critical. 4-link brackets can be incorrectly oriented to the rear end.!!!
